PROJECTS

E-Commerce Website | Html, CSS, JavaScript,React.js

2026

- This project is a modern, user-friendly shopping cart website built using React for its dynamic UI and Tailwind CSS for styling. The application allows users to seamlessly add items to their cart, view the cart details, and remove items from the cart.
- A dedicated cart section dynamically displays the selected items with details such as item name, price, and quantity. The cart automatically updates as users add or remove items.
- Users can browse available items and easily add them to the shopping cart. and A notification confirms the addition of items to the cart.
- Users can remove individual items from the cart with a single click. Real-time updates reflect changes in the cart's total price and item count

GIFs Generator | React.Js , JavaScript , Tailwind CSS

2025

- This project is an interactive GIF Generator application built using React and styled with Tailwind CSS.
- The app allows users to generate random GIFs or search for specific ones based on keywords or filters, offering a fun and engaging way to explore endless GIFs for any occasion.
- Users can generate random GIFs with the click of a button. Each click retrieves a fresh, entertaining GIF from an API.
- A search bar allows users to find GIFs based on keywords. And results dynamically display GIFs matching the search query.

Password Generator | Html, CSS, JavaScript

2025

- This password generator produces strong passwords combining numbers, uppercase and lowercase letters, and special characters, ensuring great security for various access types.
- It helps individuals who need to constantly create new random passwords.

Weather App | Html, CSS, JavaScript

2025

- This project allows users to retrieve real-time weather information for their current location.
- Built using HTML, CSS, and JavaScript with responsive UI design.
- Integrated live weather API to fetch temperature, humidity, and weather conditions.
